INTRODUCTION

LACASA Ethos | LACASA At A Glance | Organization Structure
| Key Personnel

PHILOSOPHY:

At LACASA our Design works on an exchange of thoughts and ideas, a cross blend of skills and experience with the common goal of finding a unique solution.

Once this is defined, the whole team supports the delivery of that idea through every stage of the Design and Construction process.

APPROACH:

At LACASA our extensive experience in the Middle East makes us uniquely qualified to deliver Projects.

Our full service holistic approach exposes the Concept Architect to the challenges and opportunities of designing Projects within the Middle East at the earliest opportunity.

Our Project Design Team provides the vehicle and framework for the Team to work effectively from day one without the usual learning curve associated with remote architectural involvement.

This early engagement brings immediate benefits to the Client by filtering and interpreting the requirements of the Project by creating a base understanding that forms a solid core throughout the Design Stages.

CLIENT FOCUS:

At LACASA the challenges of identifying the correct expertise to match an exacting brief is one that we relish and we embark upon each new potential Client journey with an open mind approach to providing the optimal Architectural and Engineering solution.

MIDDLE EAST BASED:

At LACASA our Design works on an exchange of thoughts and ideas, a cross blend of skills and experience with the common goal of finding a unique solution. Once this is defined, the whole team supports the delivery of that idea through every stage of the Design and Construction process.

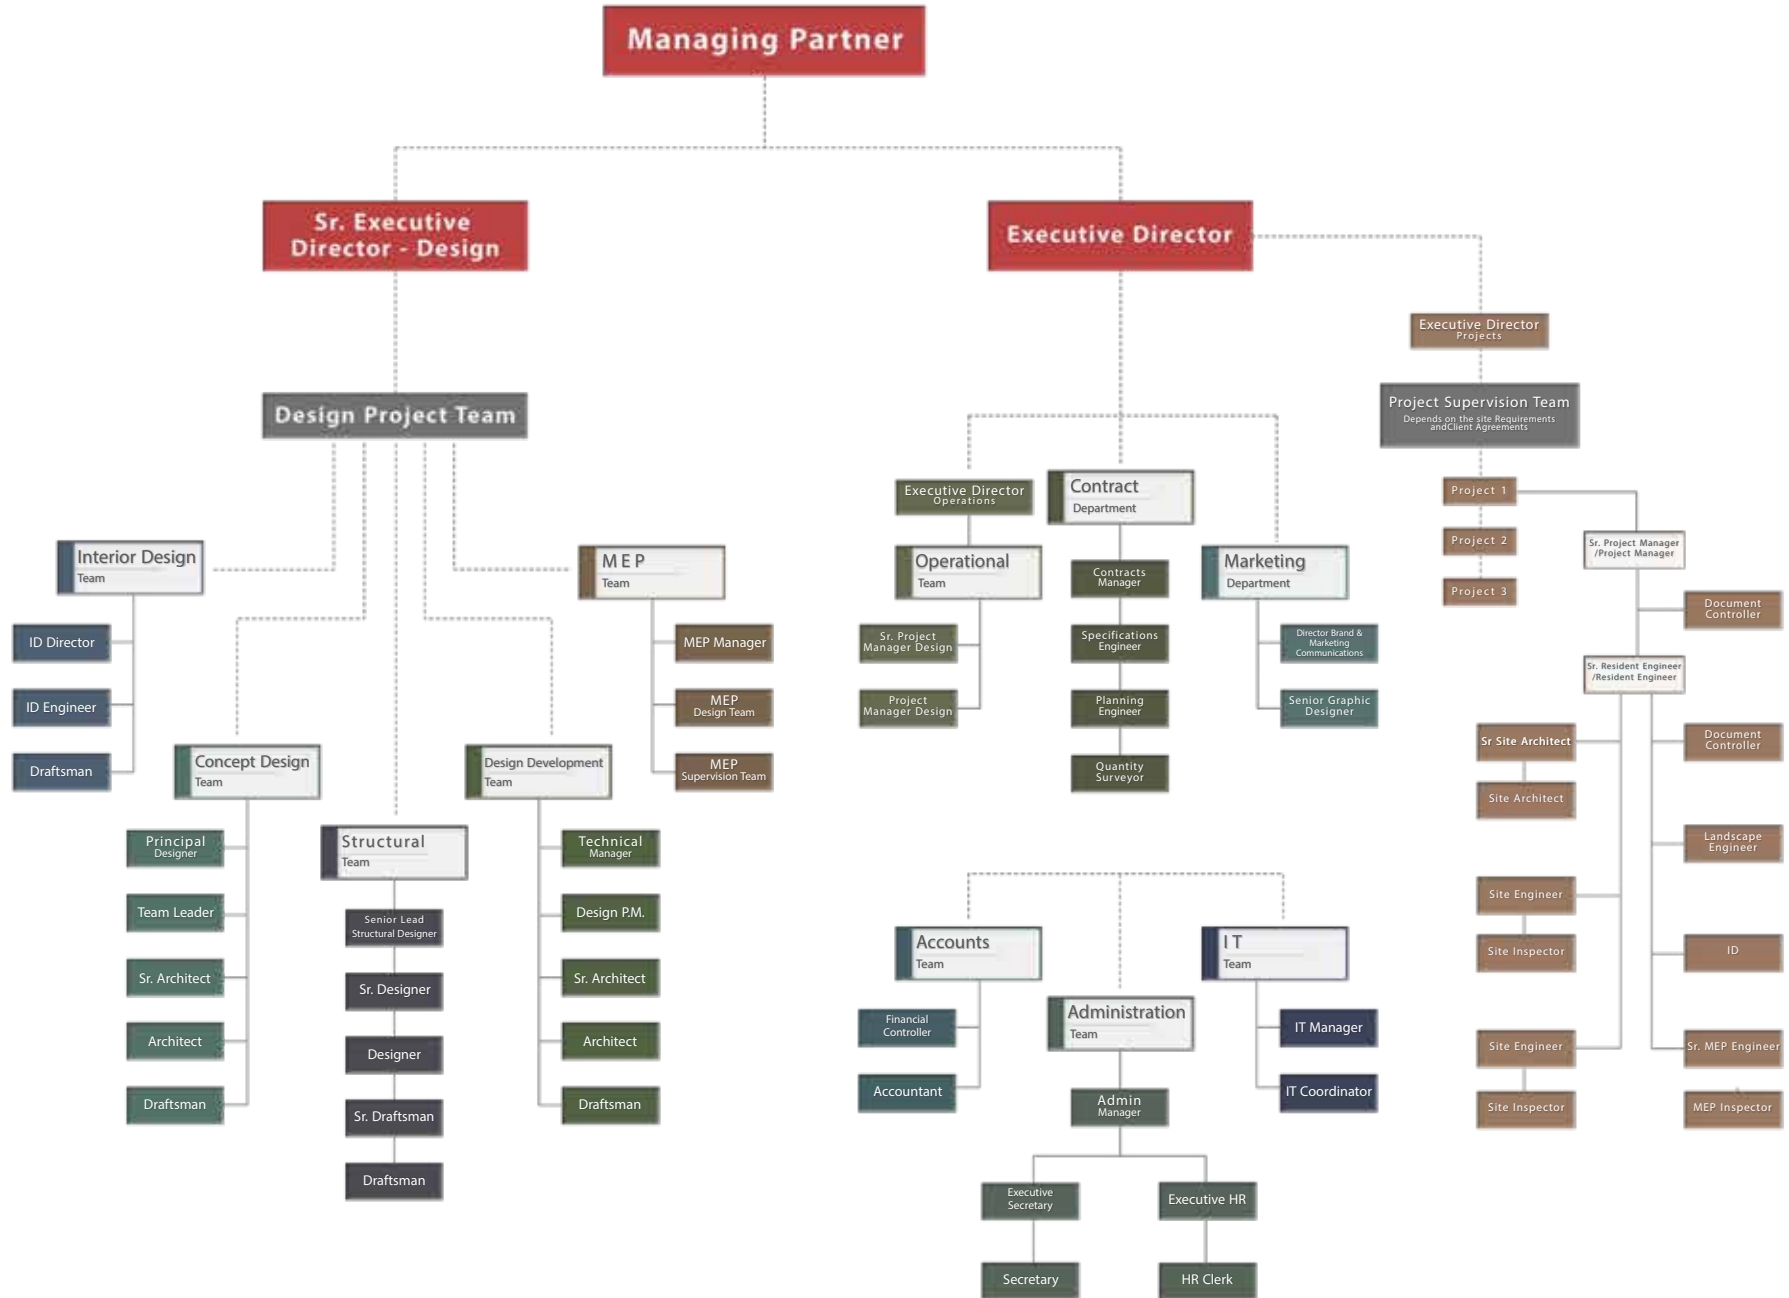

SECTOR EXPERIENCE:

At LACASA our global and local expertise and knowledge works hand-in-hand to offer an invaluable skill set throughout a broad spectrum to assist our Clients seeking to develop infrastructure, mixed use, commercial, industrial, retail, residential, hotel, leisure, health and educational Facility.

ARCHITECTURE AND ENGINEERING:

At LACASA we create visionary and innovative buildings that define the future of their time and place with each one designed to meet the individual requirements of our Clients. Our Team is hugely experienced but we are not limited by conventional thinking and look to challenge boundaries in any sector of building typology.

ORGANIZATION STRUCTURAL AND KEY PERSONNEL

THE TEAM

Team LACASA

EMAD JABER

MANAGING PARTNER

QUALIFICATION:

-Bachelor of Civil and Structural Engineering | Jordan

PERSONAL SUMMARY:

With over 37 years of experience in the region, Emad Jaber is a prominent industry leader. A Civil Engineer by trade, he has spent most of his career working as an architectural consultant with a keen eye for detail. His technical skills span structural design, MEP and construction supervision. In addition to technical knowledge, he also possesses a deep understanding of the commercial aspect of architecture and construction, ensuring that every project undertaken by LACASA is as efficient as possible. As the Managing Partner of LACASA, he oversees a large team of architects and engineers, advocating for quality-driven, masterfully planned, environmentally sustainable and commercially efficient designs.

DILIP KUMAR

SENIOR EXECUTIVE DESIGN DIRECTOR - PARTNER

QUALIFICATION:

-Diploma / B. Tech in Civil Eng. | India

-MSc in Project Management | UAE

PERSONAL SUMMARY:

Dilip brings over 30 years of invaluable expertise in the UAE's architectural and engineering consultancy services, occupying diverse roles in architecture practice throughout his career. With a profound understanding of design management across pre and post-contract phases, he demonstrates extensive knowledge in navigating local and international codes of practice. Dilip's hands-on experience in design development, detailing, coordination and his comprehensive grasp of value management have paved the way for successful delivery of numerous large-scale development projects in UAE and overseas. His unwavering passion for architectural engineering, coupled with his exceptional problem-solving skills in addressing critical design issues and deep understanding of various disciplines, ensures that each project is executed with the highest levels of quality. As the leader of design department, Dilip oversees a large team of talented architects and engineers; who are dedicated to aiding him in delivering highly efficient and sustainable design solutions that exceed client expectations.

NASRI AL GHAWALI

PROJECT MANAGER - DESIGN

QUALIFICATION:

-MSE in Civil Engineering (CEM) - Fulbright Alumnus University of Michigan - Ann Arbor MI | USA
-BSc in Civil Engineering - American University in, Dubai | UAE

PERSONAL SUMMARY:

Project Manager with previous experience in various phases of a construction projects' design and execution and two types of project delivery methods: Design-Bid-Build and Design-Build. These projects include residential, commercial, and mixed-use developments. Nasri has worked in different roles ranging from being part of the supervision team on-site as a site engineer and a project engineer; being part of a design team as a structural engineer; and being part of a facility management team as an O&M Civil Engineer. Moreover, during his graduate studies, Nasri has also worked on two research projects relevant to utilizing technology in the AEC industry. The first project investigated the feasibility of using unmanned aerial vehicles to improve project forecasting and monitoring for an enhanced on-site project management. The second project examined the challenges of robot deployment in the US construction industry. This diverse exposure allows Nasri to lead and deliver projects efficiently and in timely manner.

EXECUTED PROJECTS

RESIDENTIAL PROJECTS

Residential projects typically refer to construction or development projects focused on creating living spaces for individuals or families. These projects can range from single-family homes and townhouses to apartment complexes and condominiums. They involve various stages such as planning, design, permitting, construction, and sometimes ongoing management. The goal of residential projects is to provide comfortable, functional, and often aesthetically pleasing spaces that meet the housing needs of the community they serve.

COMMERCIAL PROJECTS

Commercial projects involve the development, construction, or renovation of properties intended for business or commercial use. These projects encompass a wide range of building types, including office buildings, retail centers, hotels, restaurants, and industrial facilities. The primary focus is on creating spaces that facilitate commerce, productivity, and customer engagement. Commercial projects typically involve detailed planning to accommodate specific business needs, zoning requirements, and often incorporate elements of design that enhance functionality, branding, and customer appeal. The goal is to create environments that support economic activity and contribute to the local economy.

MIXED USE PROJECTS

Mixed-use projects combine different types of land uses within a single development or building, typically incorporating residential, commercial, and sometimes industrial or cultural elements. The aim is to create vibrant, walkable communities where people can live, work, and play in close proximity. These projects often feature a blend of residential units such as apartments or condos, along with retail spaces, offices, restaurants, entertainment venues, and sometimes hotels or educational facilities. The design of mixed-use projects emphasizes convenience, sustainability, and community interaction, fostering a lively and integrated urban environment.

MASTER PLAN PROJECTS

Master plan projects are comprehensive, strategic plans that outline the long-term vision and development strategy for a specific area or organization. They coordinate various aspects of development—such as land use, infrastructure, and resources—to achieve defined goals and ensure cohesive, sustainable growth or improvement over time.

PUBLIC PROJECTS

Public projects are construction initiatives funded and managed by government or public entities to create structures for community use. These buildings include schools, libraries, government offices, and community centers. The goal is to provide spaces that serve the public's needs, enhance civic life, and support various community functions.
